

AUMANSH VIJAYENDRA GUPTA

AI ML ENGINEER

PROFESSIONAL SUMMARY

Recent Bachelor of Technology in Computer Engineering graduate with a strong foundation in AI/ML, prompt engineering, and NLP. Completed coursework and projects in federated learning, computer vision, and data engineering. Eager to leverage analytical abilities to design and optimize scalable AI systems and achieve impactful improvements in model performance within a dynamic technology environment.

EXPERIENCE

Statistical Data Engineer Intern • Dyne Tech AI Private Limited

Oct 2025 | Present | Bengaluru, India

- Supported AI model development and scalable machine learning pipelines.

Intern • ServiceNow

Apr 2025 | Oct 2025 | Remote

- Developed workflows and automated tests using ServiceNow Flows and ATF, enhancing process automation.

Summer Trainee • Defence Electronics Applications Laboratory (DEAL), DRDO

May 2025 | July 2025 | Dehradun, India

- Developed computer vision-based Intruder Detection System using PCA-SVD and KNN, optimizing inference time and accuracy.

AI & Cloud Intern • Edunet Foundation (IBM SkillsBuild)

Jan 2024 | Feb 2024 | Rajkot, India

- Developed an NLP chatbot using IBM Watsonx Assistant to streamline college admission queries.

Machine Learning Engineer Intern • Afame Technologies

Apr 2024 | May 2024 | Bengaluru, India

- Improved model accuracy by 80% through feature engineering and hyperparameter tuning.

Various Roles • Additional Internships (Selected)

- CSRBOX: Data Analytics Intern.
- GAOTek Inc.: Web Developer Intern.
- Infosys Springboard: Data Analyst Intern.

CERTIFICATIONS

Certifications Link: <https://www.linkedin.com/in/aumansh-gupta-5aa951269/details/certifications/>

PROJECTS

FLIP: Hybrid BFV-CKKS Federated Learning Framework

- Implemented secure federated learning with BFV/CKKS encryption achieving 99.23% accuracy on MNIST.

Naval Ship Detection (YOLOv8 + Federated Learning)

- Built real-time YOLOv8 detection system integrated with federated learning for privacy-preserving naval vessel classification.

Data Waves — Data Engineering Capstone

- Developed optimized end-to-end data pipelines, reducing execution time by 30% using SQL.

Software Fault Tolerance with ML/DL

- Applied ML/DL algorithms for software defect prediction, increasing accuracy through feature selection and tuning.

EDUCATION

Bachelor of Technology in Computer Engineering

Marwadi University, Rajkot, Gujarat

Rajkot, Gujarat • 2026

CGPA: 8.26/10 — 7th Sem SGPA: 9.18 — Medium of Instruction: English

TECHNICAL SKILLS

Python SQL CNNs DNNs

Object Detection (YOLOv8) Secure Aggregation

TensorFlow Keras Scikit-learn Pandas

AWS Problem-solving Agile

Documentation LangChain NLP

Prompt Engineering Federated Learning

Data Engineering
