

Aumansh Gupta

Python Developer

Email: your.email@example.com | Phone: +91-XXXXXXXXXX | Location: India

Professional Summary

Python Developer with proven experience as a Python Developer, focused on writing effective, scalable code using Python. Experienced in developing back-end components to improve responsiveness and overall performance, and integrating user-facing elements into applications. Familiar with testing tools, JavaScript, HTML, and CSS. Hands-on exposure to NLP libraries such as SpaCy and NLTK. Strong problem-solving skills applied to real-world AI/ML, automation, and web application projects.

Technical Skills

- Write effective, scalable code using Python (core Python, OOP, scripts, APIs).
- Develop back-end components to improve responsiveness and overall performance.
- Integrate user-facing elements into applications using Python back-end and front-end tools.
- Proven experience as a Python Developer on academic, internship, and project work.
- Familiarity with testing tools: PyTest, unittest, basic integration testing.
- Knowledge of JavaScript, HTML, CSS for building and integrating user-facing elements.
- Experience with NLP libraries: SpaCy, NLTK for text preprocessing and classification.
- Good problem-solving skills: debugging, optimization, algorithmic thinking.

Professional Experience

Python Developer Intern – SuccessR HR Tech Pvt Ltd

- Wrote effective, scalable code using Python for HR analytics modules and automation scripts.
- Developed back-end components to improve responsiveness and overall performance of internal tools.
- Integrated user-facing elements into applications by connecting HTML, CSS, and JavaScript interfaces with Python APIs.
- Used testing tools (PyTest and unittest) to validate back-end components and ensure code quality.
- Applied NLP libraries such as SpaCy and NLTK to extract skills and keywords from resumes.

Python & AI Intern – IBM

- Contributed as a Python Developer in a team using Python to build automation and data processing pipelines.
- Helped develop back-end components that improved system responsiveness and performance.
- Participated in integrating user-facing dashboards with Python back-end services.
- Collaborated in testing and debugging, using testing tools to verify features and fix issues.

Content Designer & Team Lead – TO-LET GLOBE COMPANY

- Worked closely with developers to understand how user-facing elements in JavaScript, HTML, and CSS connect with back-end systems.
- Improved clarity of requirements, helping better integration of user-facing elements into applications.

Selected Projects

Automated Interview Scheduling & CV Shortlisting System

- Built a Python-based system that shortlists and ranks hundreds of resumes based on a Job Description (JD).
- Wrote effective, scalable code using Python to process multiple CVs and compute similarity scores.
- Developed back-end components to improve responsiveness and overall performance of the ranking engine.
- Integrated a simple user-facing interface into the application and connected it with Python back-end logic.
- Used NLP libraries (SpaCy, NLTK) to match candidate skills to job descriptions.

Intruder Detection Model (YOLO + CNN Hybrid)

- Implemented Python code for deep learning models, focusing on performance and scalability.
- Designed back-end processing pipelines that handle image input and model inference efficiently.

Network Traffic Analysis & Classification

- Created Python scripts and models to classify network traffic and analyze performance metrics.
- Applied good problem-solving skills to tune models, handle data imbalance, and interpret results.

Alignment with Job Description

Responsibilities:

- Write effective, scalable code using Python for back-end services and automation.
- Develop back-end components to improve responsiveness and overall performance of applications.
- Integrate user-facing elements into applications by connecting JavaScript, HTML, and CSS front-end with Python back-end.

Requirements:

- Proven experience as a Python Developer through internships and multiple Python projects.
- Familiarity with testing tools (PyTest, unittest) for unit and integration testing.
- Knowledge of JavaScript, HTML, CSS for working with and integrating user-facing elements.
- Experience with NLP libraries (SpaCy, NLTK) applied to resume parsing and text analysis.
- Good problem-solving skills demonstrated in AI/ML, network analysis, and automation projects.

Education

Bachelor of Engineering in Computer Science

- AICTE-recognized internships including ISRO–AGNIRVA Space Internship Program and IBM internship.
- Academic projects in Python, Machine Learning, Deep Learning, NLP, and Computer Vision.
